# MENU

At Scandic's restaurants, we have respect for good food. Our kitchen has roots in the Danish and Nordic cuisine with consideration for seasonal ingredients. We cultivate the natural, the simple and the regional - and we have the courage to be inspired by other cuisines, if the taste is right. Our chefs have a special love for organic, animal welfare and local sustainable ingredients, and you can always be sure to get a proper steak and fresh fish. We have the award-winning Finnish Natural Cattle from Freygaard in the ripening cabinet and cut it out to the best steaks. .

Why shore crab:

There are approximately 12 billion shore crabs along the Danish coastline of which most of them belongs to invasive species. The shore crabs are a big problem for both fishermen and the ecosystem. They eat the fishermen's catch, destroy their nets and threaten the existence of other co-existing species. They eat the fry of the fish and displace other species from their good habitats. They can destroy the underwater eelgrass fields when they dig up the roots in search of food.

In France, Spain and Italy there is a tradition for using stock based on shore crabs in the daily cooking. In Denmark, we have not had this tradition, which is a shame because stock made from crabs tastes fantastic
